

Michigan DNR Officer Charles Skiba

A Declaration By Robert Gregory Boensch

DNR Officer Skiba in the early 1970,s was the one that told me of the DNR shooting of his partner just after he moved to Au Gres Mi where I live

interesting now that i think about it how he was so candid about the story right after it happened and the DNR moved him to my town for his safety

and he was on our farm telling it as he was getting corn from us for his deer hunting

When i was young i just let stories go as they were said

as i reflect on this story and other events they were put away in my mind

and in the review of everything he did in my neighborhood and on our farms and threatening to shot me several times his temper was off the scales

and also the night that a 16 year old boy was shot in 1993 after coming home from school he was at my parents farm house going through it even down in the basement

looking around was he trying to plant evidence on this shooting ?

i believe he was involved in the death of at least 5 people that were killed as i posted on the web

and the lawyer scully was a close friend and did the fraudulent deeds that cause me to loose land and was transferred to skiba his friend

a bloody deed that killed many people

he threaten my wife with out me being present

every body in town heard of the many threats he made

to me and my family

in 2014 after the November election a DNR office came on to my farm and was poised

for a confrontation with me his gun was unstrapped on his hip

and was very tense in first talking to me i asked him if he was recording the talk he said no

but we all know his radio was transponding, after about 5 minutes of this conversation

his posture changed and he relaxed and made this statement

he apologized to me about how he approached me as a danger and told me of the stories that was told about me that made him act this way and stated that i wasn't the person that they projected

I told him about all the dead people and who the players were and about the deeds and more

i know every one in law heard what i said over his radio

and after he left my farm a truck with federal government plate stopped on the road behind this dnr officer truck and they talked

in front of my farm with me watching and my wife was on the road by them

so in 2014 i told a story to a Michigan dnr officer and a person in a federal government truck listens

and they do nothing and at this same time on the web this was posted a copy is shown here

<https://archive.org/details/20141117-index>

my neighbor Chuck Skiba a DNR officer Shot at my two boys in 2008 with a fire arm the family came from alpena michigan

and every body from one end of this state to the other knows this family member as an evil person

In his early DNR years he was station in the western upper part of the state and he got into and entanglement with a hunting group

the story goes that they made up their mind that the next time he shows up on their property they would kill him

some time later a DNR officer showed up on this property and was killed ==it was his partner and he was killed

A couple of years ago I went back in time and review all of the actions that he did to my family

and then did a remote viewing taking all of the data points that i had on him and all of the crimes he did and got away with for 35 years on our farms

he trespassed with out cause broke into our buildings and stole property etc

so then i did a remote viewing traveling back in time to this DNR Officer shooting

it was very clear that DNR Officer Charles Skiba Di liberty Shot His Partner and set up these hunters to take the fall on this killing

Was my viewing of this shooting of a DNR Officer Correct and did it happen?

Be very aware of the Skiba Name
